Digital Kiln Remote Units for Manual Kilns

These units convert a manual kiln to a digital kiln by plugging the kiln into the controller and the controller into the wall. Then placing the thermocouple into the kiln through the hole to read the temperature. When ordering state the volts, amps of the kiln, and the NEMA number, (6-30R or 6-50R), of the receptacle, or send a picture. Most Remotes have Mechanical Relays. our kilns amperage has to be lower than the controllers amperage.

Volts and Amps

	3 Button AF3P	12 Button AF12	Touch AF Slide	Touch TAP
120v 15 amp Mechanical Relay	\$550.00	\$700.00	775.00	\$875.00

240v 50 amp SSR Relay	1125.00	1275.00	1350.00	1450.00

(Specify which style plug is required) Also, remotes do not work on kilns with auto turn up devices, only manual kilns that have to be turned up by hand.

(We can also do special order remotes to fit most needs and Remote Controllers with Mercury Relays on case by case basis. No Mercury Relays to these States, Please do not order. CA, IL, CT, MN, ME, MA, RI, VT, & NH Order Mechanical or SSR instead) When ordering a digital remote controllers, verify that your kilns voltage, amperage requirement and power cord configuration match the specifications shown above. Remotes are made to order and there is a restocking fee of 20% so double check.

Please call when you have questions about kilns and options.
